

For those who do not wish to participate in the Swedish Pregnancy Register

The Pregnancy Register manages data from pregnancy, childbirth and the new born. Responsible for the register is the Swedish Health Care.

The purpose of the Pregnancy Register is to increase the quality of Swedish health-care. Our vision is to improve the health of mothers and children. If you want to know more about the Pregnancy Register, the type of data that are collected and how the data is handled visit graviditetsregistret.se

Not everybody wants to participate

If you want data from your medical record to be blocked from being sent to the Pregnancy Register, fill out this form and send it to the address below. If you have had earlier pregnancies you can also have your previous data removed from the register.

After your data is deleted they are no longer stored in the register and is also impossible to recreate. You will receive a confirmation by mail.

Your request will be safely stored and there will be no register made from the "non registered".

If you have any questions, please contact our administrator Else Friis: info@graviditetsregistret.se. You can also write her a letter to the address below.
